330-205	Washer	2
330-210	Washer	2
330-506	Washer	1
345-010	Buckle	1
350-040	T-Nut	2

MAINTENANCE SCHEDULE

Your regulator should be serviced on a frequent basis to achieve the best performance from your mask. A regulator which is out of tune will make it difficult to breathe. In turn, you may find yourself short of breath and unable to work to your full capacity.

Your entire regulator should be rebuilt every year or 400 operating hours, whichever occurs first. To make this job easier we recommend a set of KMDSI regulator adjustment tools, Part #325-630

⚠ CAUTION

Use only KMDSI original replacement parts. The use of other manufacturers' parts will interfere with the performance characteristics of your life support equipment and may jeopardize your safety. Additionally, any substitutions will void any warranties offered by KMDSI. When ordering spares, always insist on Kirby Morgan Genuine Parts.
