**525-102 Double Exhaust Kit 17A/B, 525-130 Front Weight Kit, 17A/B, 525-103, 550-087 are Discontinued**

### Products Affected:

Part Number	Description	Replacement
525-102	Double Exhaust Kit, 17A/B	QUAD-VALVE Exhaust Kit, 525-759
550-087	Double Exhaust Body	QUAD-VALVE Exhaust Kit, 525-759
525-103	Double Exhaust, Whisker Only	QUAD-VALVE Exhaust Kit, 525-759
510-558	Double Exhaust Whisker	QUAD-VALVE Exhaust Kit, 525-759
525-130	Front Weight Kit, 17A/B	None

Kirby Morgan has discontinued the Double Exhaust Kit and its components. This kit was designed for the SuperLite® 17A/B helmet. In addition, the SL 17A/B Front Weight Kit has been discontinued.

**525-103/510-558**

**550-087**

**525-130**

The Double Exhaust was an early system used on the SuperLite 17A/B helmet. Made for diving in polluted water, it was designed to help prevent water back-flow into the helmet. The QUAD-VALVE exhaust (standard as of Feb 2005) eliminated the need for the double exhaust 14 years ago.

The front weight kit was made to add two pounds to the SL17A/B helmet. The front weight came out long before the QUAD-VALVE exhaust system. The reason for its discontinuation was that the mount position of the weight (on the water dump valve) prevented upgrade to the Quad Valve Exhaust system.

The remaining supply of 525-130 Front Weight Kits is limited to stock on hand. Once this is gone we will not reorder.

Please contact your local KMSI dealer or e-mail [sales@kirbymorgan.com](mailto:sales@kirbymorgan.com) for more information.
